EQUIPMENT

NEW 2 in 1 flex lance tool - 2XLTC / XXLTC

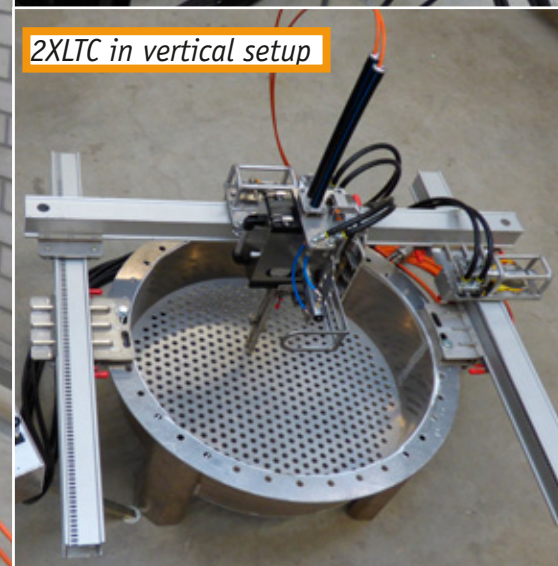

2XLTC on standard XY-frame

2XLTC on flex frame

2XLTC in vertical setup

2XLTC

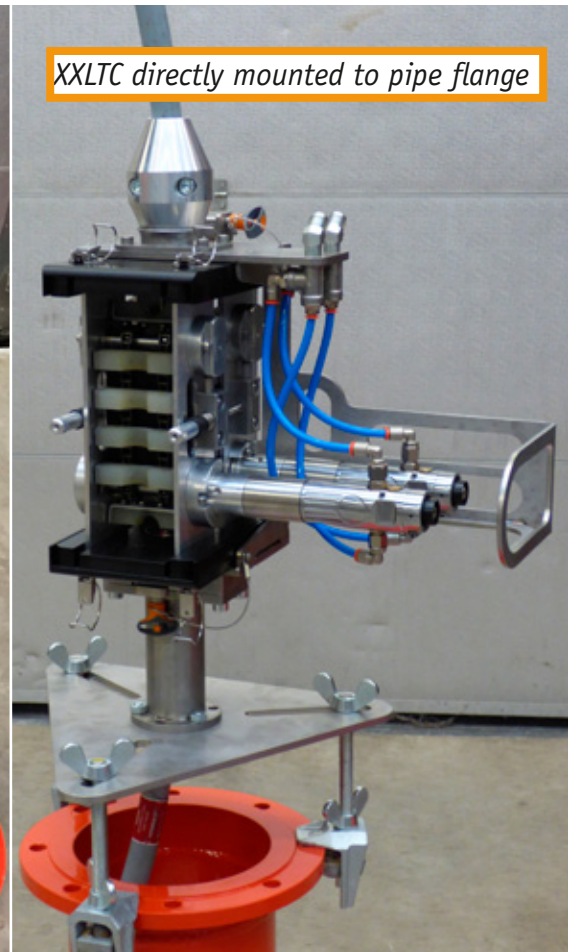

The new 2XLTC is the latest addition to our flexlance range of Peinemann Equipment. Like with all our latest "X" models this device is equally portable (23kg - 50 lbs), easy to use and multifunctional. It will allow the use of a multitude of hose sizes from 4/2 up to 8/4 to cover the majority of tubes encountered. The 2XLTC is a great tool for cleaning most of the usual heat exchangers, both horizontal and vertical as well as bundles with larger ID tubes such as evaporators. It can be used on the common flex frame, a standard XY frame or even on a scaffold construction for vertical exchangers.

2XLTC can easily be converted into a XXLTC

XXLTC with flexible guide hose to pipe adaptor

XXLTC directly mounted to pipe flange

XXLTC

As with most cleaning equipment from Peinemann this new 2XLTC can easily be converted for additional tasks. This 2XLTC is a multifunctional tool that can easily be converted to allow for a single large hose for pipe cleaning applications as well. The single large hose set up, know as XXLTC, comes with an easy exchangeable track and a dual motor set up. The larger single track will allow for 1/2" and 3/4" hoses and has a force of approx 150 kg (350 pounds) in order to work with large lengths of hoses for pipelines.
